

EDEN
SMART PROXY

In just one click 

-  Provides stable, low-risk APR
-  Reduced liability risk for exchanges
-  Block Producers have more income

Three simple steps

1

**Stake and
delegate
your EOS**

2

**APR is
implemented**

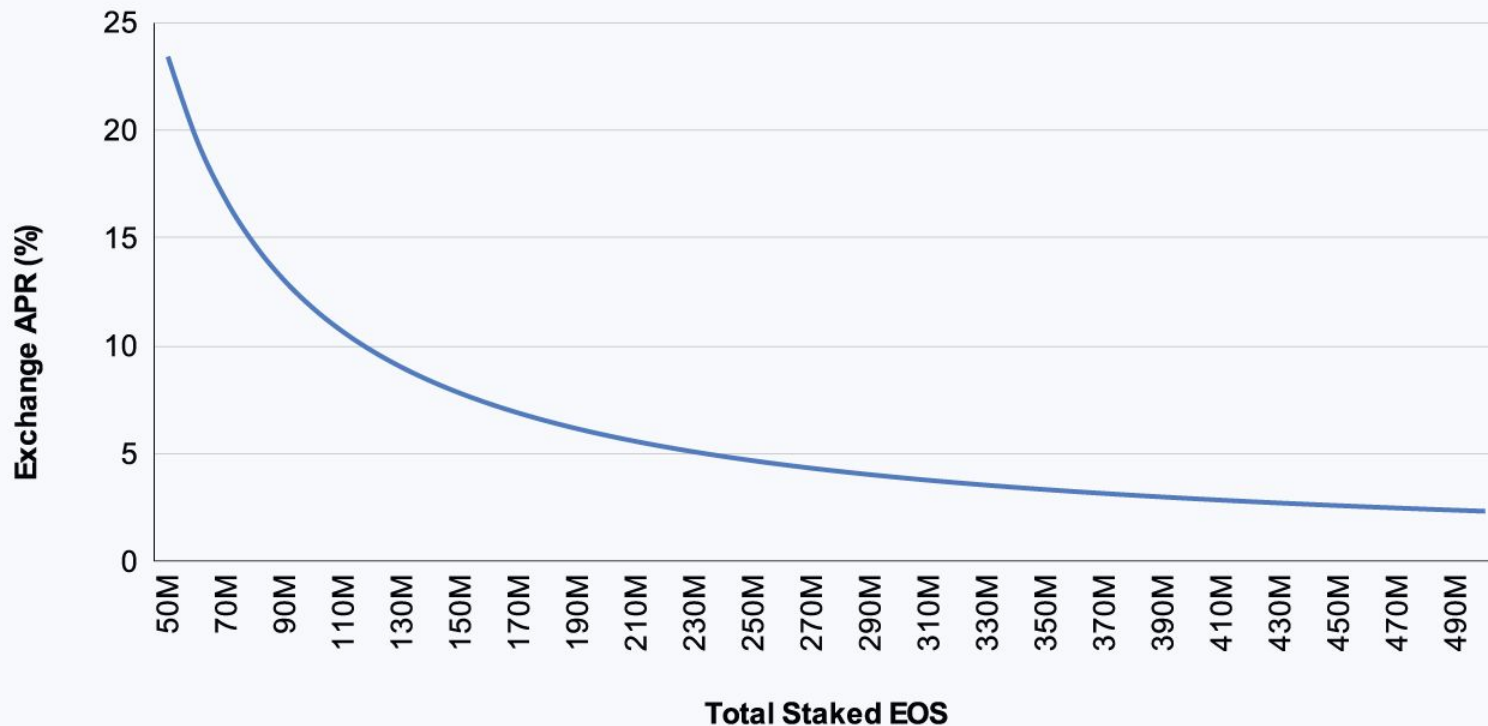

3

**Receive
APR**

APR is implemented when BP's redirect inflation to the proxy.

Stake early for maximum APR

Staked Token APR - 23% to 2.3%

*NOTE: 23% to 2.3% APR is based on 50M to 500M staked EOS.

EDEN SMART-PROXY

APR yielding proxy for staked EOS tokens

Leverages community BP whitelist

Eden community votes to rank whitelisted BPs

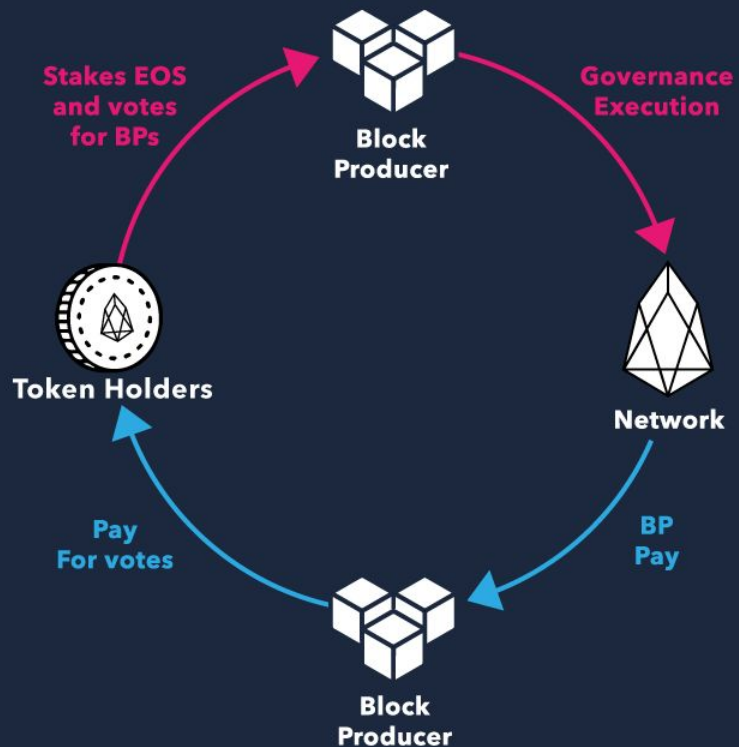

Votes for selected BPs based on ranking

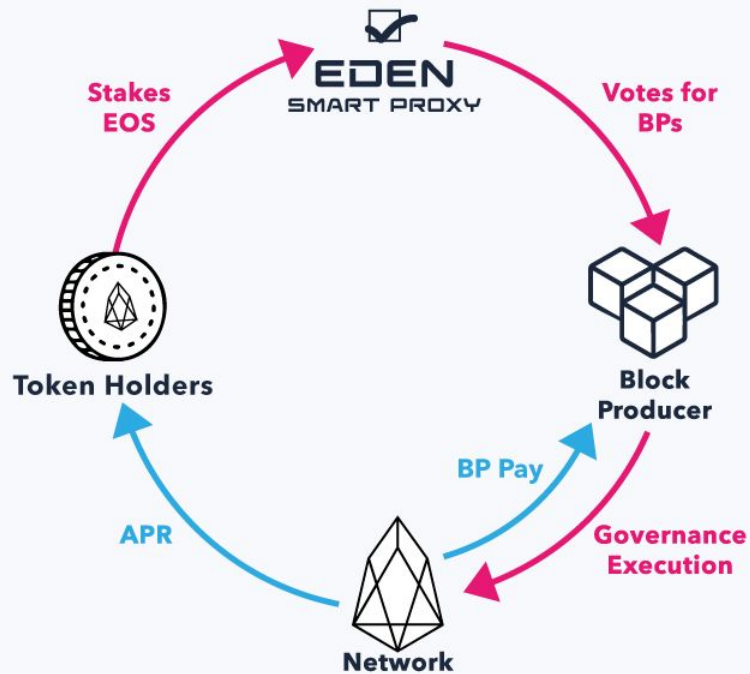

Directs 1.05% network inflation to stakers

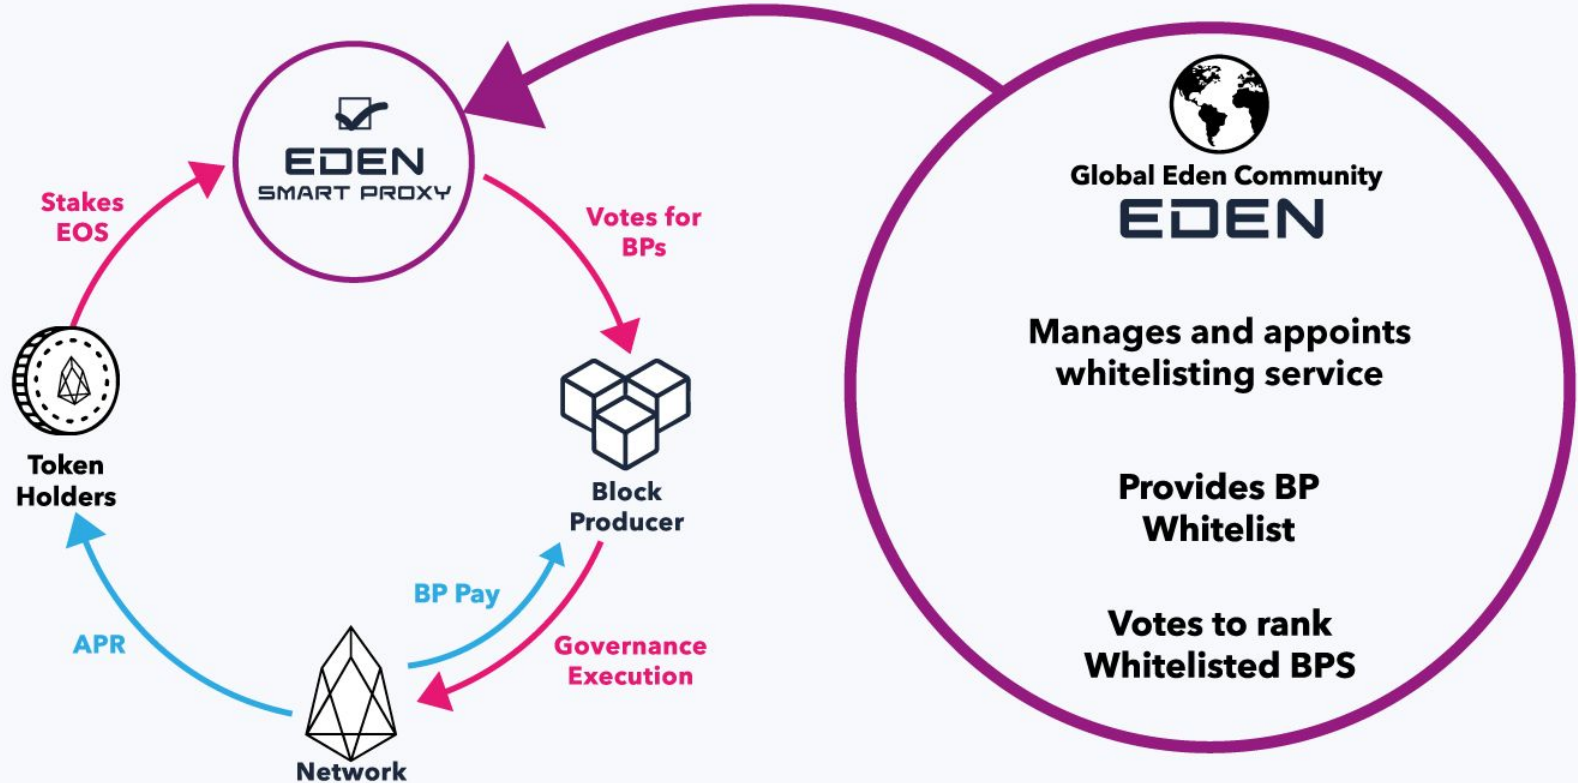

Current

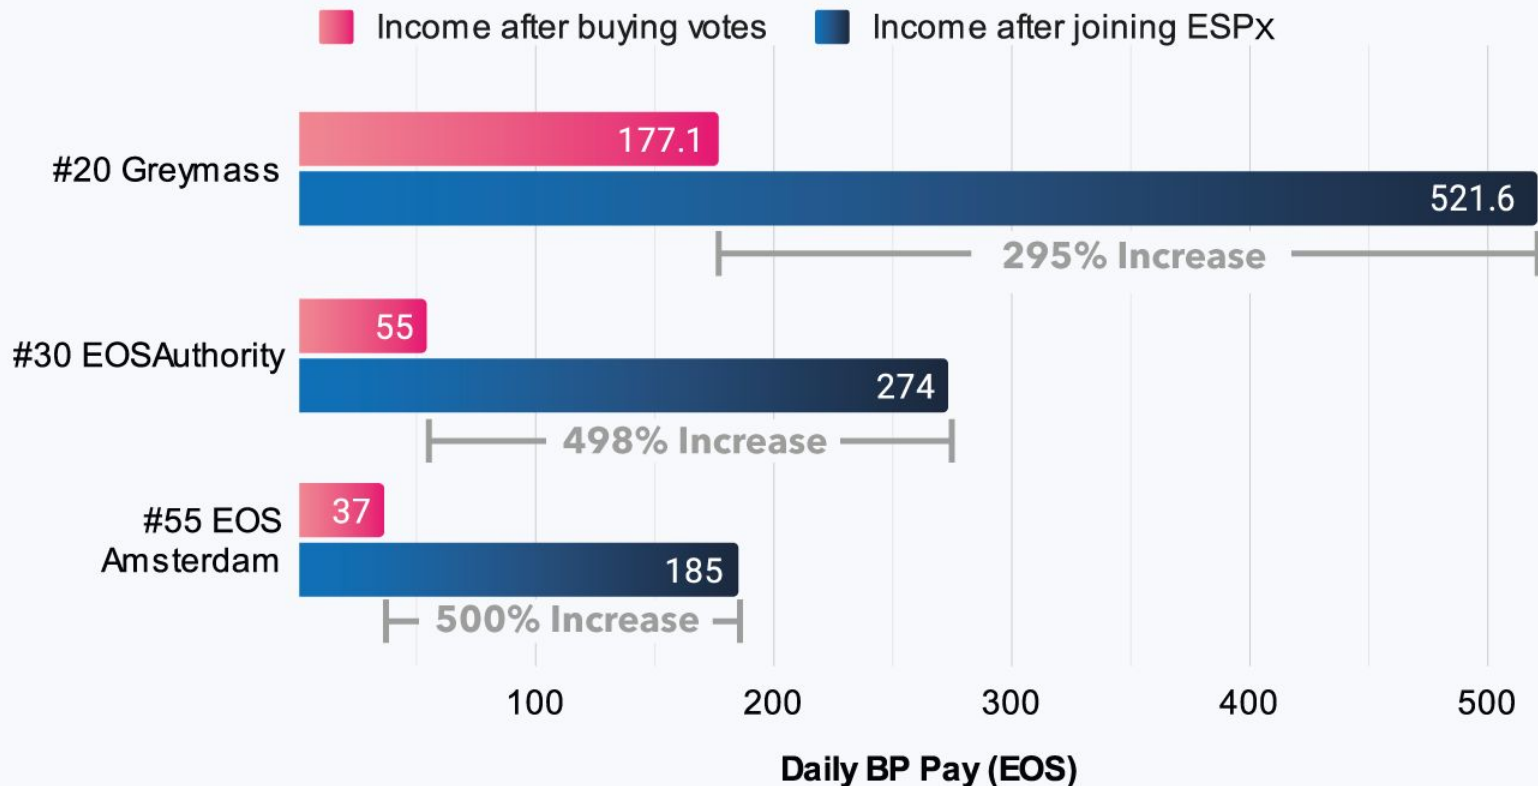

✓ New

COMMUNITY DRIVEN

3-5X PAY INCREASE FOR WHITELISTED BPs

*Best estimated figures. Block producer vote buying calculated at 80% of total Block Producer pay.

BP WHITELISTING CRITERIA

No engagement in bribes

Quarterly public reports on finances and operations

Only run one BP

Conclusion

Token Holder:

Risk-free (Non-custodial)
potential **APR 23% - 2.3%**

Exchanges:

Reduced Liability Risk:

Tokens affect governance through a transparent, community led democratic process.

Block Producer:

Free votes = Increased income.

Website for BPs to present accountability and transparency.

Network:

Large **custodians stake EOS** and are compensated directly by the network, while BP selection is further decentralized.

How to get involved

Token holder and custodians:

Stake your EOS to the Proxy.

Block producer:

Become transparent and accountable via the whitelist

Confirm Msig to redirect inflation to token holders and custodians.
